Legend to annex

- 1 East station equipped with 7 French transformers, inscribed with the numbers I - VII.
- 2 West station equipped with 2 smaller transformers.
- 3 Insulators, switches, masts, erected in gravel fields which are surrounded by asphalt sidewalks.
- 4 Asphalt sidewalks.
- 5 Three iron masts, beginning of the transmission line to YEREVAN.
- 6 Three iron masts; presumably the transmission line to KARAKAN, under construction, will be connected herewith.
- 7 Plant tracks, connecting the seven large transformers and the transformer repair shop.
- 8 Transformer repair shop, stone building, 120 x 90 feet.
- 9 Fitting shop for the construction.
- 10 Lift and stairs to the turbine house; only a small house is to be seen from the outside.
- 11 Underground tunnel leading to the administration building.
- 12 Administration building and control station, 120x150 feet, basement and first floor completed. The basement housed the control station and plant management office. According to Soviet statements this will be a three-story building.
- 13 Large traveling crane.
- 14 Road, passing underneath the traveling crane, going around the transformer station.

The transformer station and switching installations are by a steep slope, south of a hill. The traveling crane is located 200 feet lower than the northern part of the road (14).
